RE: Moose Line Spruce Salvage

Dear District Ranger Kuennen,

Conservationists with Common Sense – CWCS supports the proposed salvage/ sanitation harvest of the white spruce plantation on the Moose Line Road near Hoyt Lakes, Minnesota to reduce the infestation of spruce budworm.

We also support the decision to thin some of the white spruce and red pine adjacent to this white spruce plantation.

We understand that measures are needed steps to insure improved health and growth of the trees, in addition to preventing the risk of wildfire.

Thank you for this opportunity to comment.
